*Local employers honored for their internship opportunities.*

## **MI Technical Solutions Receives 2023 Top Employer Award for Interns**

**Newport News, VA April 11, 2024** – MI Technical Solutions (MITS) attended the Virginia Talent + Opportunity Partnership (VTOP) Awards Breakfast hosted by the 757 Regional Internship Collaborative at Christopher Newport University (CNU). During the breakfast, MITS was awarded a 2023 Top Employer of Interns for the VTOP Region 5 Area. This award honors local businesses for their outstanding internship programs and work-based learning opportunities offered to students.

MITS provides many high school and college level internships year-round. Students who intern at MITS receive hands-on training in the engineering, cybersecurity, and information technology fields while working alongside employees in a fast-paced, professional environment. MITS views these programs as investments in future talent because many interns are frequently offered the opportunity to become an employee upon the completion of their internship and graduation.

MITS is a proud member of the 757 Regional Internship Collaborative. The 757 Regional Internship Collaborative is an organization that brings together educators, businesses, and regional leadership to advance evidence-based learning for local students. They frequently host networking events and training sessions to share best practices with employers in order to further strengthen their internship programs.
